

YOU ARE INSURED - IS YOUR CUSTOMER?

If you are an Architect, Contractor or Project Manager doing large property extensions or alterations, your customer's property insurance will be invalidated once the buildings works starts. Most Property Owners are unaware of this.

Building Works may leave your customer without ANY or LIMITED insurance

- Property Owners are potentially at risk of their insurance policies being deemed invalid. This is due to most property insurance policies being based on the structure of the property as it stood when the policy was taken out.
- Property Owners MUST advise their insurer of the building works, prior to any works being carried out.
